Our Approach to Active Management

No single data point can come close to telling the full story of William Blair’s approach to active management.

Our approach to active management consists of autonomous teams with shared values operating in an environment in which investment professionals can thrive. A strong foundation gives each team the freedom and resources to engage in high-conviction investing in the pursuit of alpha. Each of our five investment teams defines “active” differently within their strategies.

Moreover, at William Blair, active management is much more than an investment approach. While stability has been at the core of our existence since our founding in 1935, our active ownership culture promotes a dynamic environment in which our business and investment processes continuously evolve with a constant focus: Align with clients’ interests and help them achieve successful investment outcomes.

ESG Integration

At William Blair, we consider environmental, social, and governance (ESG) factors to be among the many considerations that inform our investment decisions.

For all of our fundamental equity and fixed-income strategies, ESG factors are inextricably linked with our fundamental assessment of company management and sustainability of competitive strengths.

From a governance perspective, our key focus is on board composition, minority shareholder treatment, management incentives, and corporate culture. Environmental areas of focus include climate change, natural resources stewardship, and pollution and waste management. Social considerations include human capital management, customer well-being, supply chain management, and community relations. The materiality of these issues varies by country, industry, and company.

Our research analysts provide a qualitative summary of what they view as each company’s relevant ESG-related risk exposures. These issues are documented within our company recommendation reports and discussed by the analysts and portfolio managers during our regular team meetings.

In addition to our proprietary ESG research, third-party ESG company ratings are systematically incorporated into our research reports to provide additional context.
We offer a wide range of strategies across vehicles, including separately managed accounts, collective investment trusts, mutual funds, and Luxembourg-domiciled UCITS funds.

An important aspect of William Blair’s positive reputation within the investment community is its approach to new business and asset flows. We diligently monitor the capacity of our strategies and act proactively to address potential capacity issues before they affect the integrity of portfolios and long-term performance—and we have proactively closed certain flagship strategies to maintain the integrity of portfolios and avoid any resulting impact on long-term performance.

As of September 30, 2023, William Blair manages $60.7 billion in client assets.
